

16ft Welfare Unit

HIRE OR BUY

The 16ft Mobile Welfare Unit is purpose built to meet customers' precise requirements. It is a secure anti-vandal unit designed to meet the needs of any utility or development project, whilst ensuring compliance with the latest Health and Safety legislation. It ensures that site staff benefit from welfare facilities for the duration of the project.

The structure is a secure fully welded galvalite steel construction, 4.9m x 2.3m in size. It has high security

doors with heavy duty hinges and security deadlocks. It also has a side opening window with anti-jimmy sliding security shutter, which is locked from within the unit using retaining bolts.

The running gear and chassis with Tandem AI-KO Euro axles allow for greater flexibility in terms of location. It is supplied with a unique removable draw bar system to be stored inside the unit, a wheel clamp and the new Supermule chassis anti-theft arm for additional security.

Benefits

High standard specification / Outstanding value

- Mobility allows for easy relocation
- Peace of mind anti-theft features
- Pleasant daytime facilities support staff morale whilst complying with current Health and Safety legislation
- Easy to clean and maintain interior finish
- Options available maximise efficiency and minimise maintenance
- Versatile/Can be supplied as a static Jack Leg unit

16ft Welfare Unit

HIRE OR BUY

General Structure

The structure is constructed from 1.25mm I Z Galvanite steel with continuous seam welded joints on a heavy-duty chassis. The flooring is constructed from 15mm exterior grade plywood with polyfloor covering to the topside and galvanised sheet to the underside for durability and protection against fire. The unit is sprayed

externally to an average film thickness of 75 microns to customers colour requirements. The walls and ceiling are 12 vinyl faced moisture resistant boarding with water proof rubber seal to the flooring and ventilation to all compartments. Laden weight is between 2550KG & 2700KG depending on generator option.

Doors, Window & Shutter

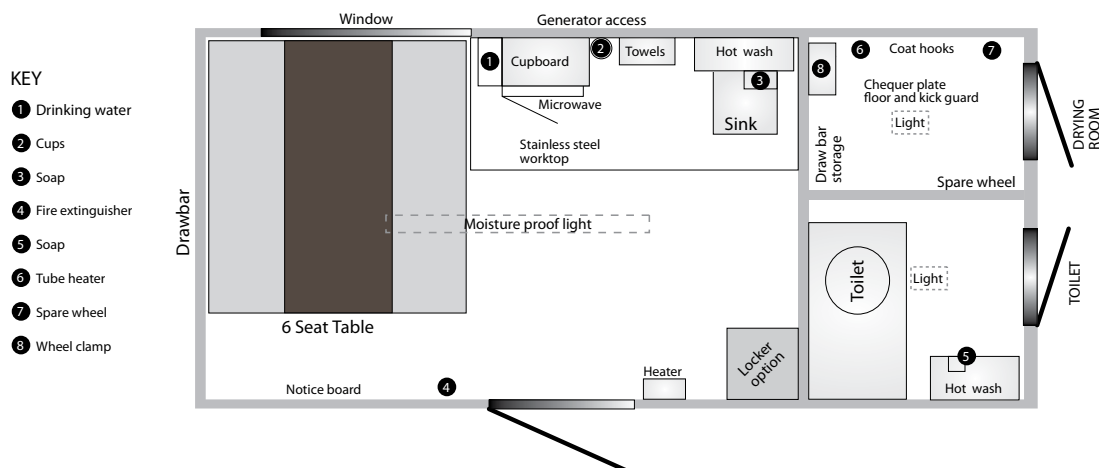

3 x high security insulated steel doors with heavy duty hinges and double deadlocks with common keys. Galvanized heavy duty anti-slip steps to all doors. 900mm wide x 1000mm high pvc coated aluminum

framed window with top opening. The window has an anti-jemmy sliding security steel shutter operated from within the unit. Double security doors give access to the built-in generator.

Running Gear and Chassis

Tandem AI-KO Euro axles with sealed-for-life bearings, 3000kg gross weight. 155x12" low profile wheels with spare wheel included. Removable galvanised draw bar to be stored inside drying room. Wheel clamp.

4 heavy duty serrated corner steadies with levelling adjustment. Removable road lighting board to be stored inside drying room. Heavy duty serrated jockey wheel and swivel clamp.

Generator

- Europower Super silent petrol 6KVA generator
- Anti-vibration generator mounts
- Sound insulation to generator compartment
- Remote generator start
- Low fuel alarm

Canteen area

- Table and 6 chairs
- Auto-flow hot water system
- Microwave • Kettle
- Soap dispenser
- Towel dispenser
- Stainless steel sink and worktop
- Wall cabinet with stainless steel door

- Fire extinguisher
- Waste container • Water container
- Drinking water container
- Cup dispenser
- KW wall heater with thermostatic control
- Single 1500mm moisture proof fluorescent light
- Moisture resistant light switch
- Consumer unit with RCD and MCB's with relay operated priority sensing system

WC

- Thal re-circulating flush tank toilet, 136 litre capacity
- Sink to wash up to forearm

- Auto-flow hot wash to sink to give 20 seconds flow of water initiated from passive sensor
- Soap dispenser • Towel dispenser
- Toilet roll holder • Bulkhead light
- Water resistant light switch

Drying room

- 6 coat hooks
- Tube heater with cover
- Bulkhead light
- Moisture resistant light switch
- Draw bar & lighting board storage
- Tread plate floor and kick board covering
